ONE DISCOVERY

ONE Discovery is the ONE Solution

Drastically Reduce Your Organization's eDiscovery Spend— At the Source

eDiscovery is a $22 Billion market. According to a Rand study[1] on eDiscovery costs, 75% of those expenses are directly attributed to document review - Eyes on review spend is $16 billion annually.

How Much is Your Organization Spending on eDiscovery?

Corporations **overspend millions of dollars** when managing in house legal operations on a case-by-case basis by collecting, processing, and reviewing the same relevant data in multiple matters. **Corporations are challenged to provide adequate institutional oversight because the speed and volume of data grows exponentially.** Data will always outpace resources when they are tasked with responding to individual matters.

Demonstrably Lower Your Organization's Expenses with ONE Discovery for In House Teams:

- **Deliver Proven Infrastructure & Scalability:** ONE Discovery scales with you - lowers costs significantly and improves response times by warehousing high frequency custodial data.

- **Reduce Document Review Spend:** Rehydrate static coding decisions in one case back into the master data repository and apply them across all cases with overlapping data.

- **Improve Accuracy & Consistency:** Reuse static coding decisions across all cases with overlapping data. Reduce inconsistent results when managing matters reactively on a case-by-case basis.

- **Increase Response Times:** Materially improve response times by maintaining load ready data repository and limiting productions by excluding privileged documents. What once took weeks and months is completed in hours or days.

- **Lower Collection & Processing Costs:** Collect and process all high frequency data one time, and eliminate costs associated with reactively collecting and processing the same data for each matter.

- **Upgrade Security:** Corporations retain more control over documents, process, and security using ONE Discovery on-prem and in place solutions.

- **Identify High Risk Individuals and Events:** Understand security risks and breach response preparedness.

- **ONE Discovery ROI:** Save your organization tens of millions of dollars annually, support archiving and compliance for regulated data, and improve your data and egovernance posture.

With the **ONE Discovery Master Repository**, pool your organization's entire EDS corpus into a single index of your most frequently-litigated custodians.

ONE Discovery **Success Case**

CLIENT:

Multi-billion-dollar engineering company, News-Record top-20 ranked, with a global professional services organization that handles complex infrastructure and development challenges.

BUSINESS CHALLENGE:

The client needed to import, sort, and index a large local server that was a repository for multiple unrelated projects at the client's company. Server had over 8 TBs of data, in multiple formats from emails, to spreadsheets, to image files, and other 'office' document formats. It was anticipated this 8TBs of data was going to be needed for discovery in multiple pending matters. The client needed a solution in which this data could be optimized to allow for use in multiple matters, in a defensible fashion, and avoid unnecessary re-processing.

SOLUTION:

Leveraging ONE Discovery allowed us to strategically build a master index that could be searched by multiple legal teams. In addition, the data was partitioned with our granular security features to provide data security between case teams, isolated each team's work product from each other, while allowing them to repurpose work product as needed. Sub databases were created for multiple matters, but the data was stored and processed only once. The overall savings to the client was in excess of $4 million.

The ONE Discovery Toolset Delivers for Your Organization

With ONE Discovery's powerful end-to-end platform and our single-instance storage architecture, an organization can process hundreds of TBs into one load-ready repository. From smart data, storage protocols, and automated workflows to real-time resource management, ONE Discovery will track and store the most frequently relevant data across all cases, leveraging previous investments/spend/effort. With all your ESI in a single repository, companies have reduced eDiscovery spend and time to review. Let ONE Discovery deliver your organization from costly eDiscovery and data spend with agile, iterative solutions that help in house teams run more efficiently and effectively.

ONE Discovery is the ONE Solution to reduce your organization's total eDiscovery spend. We are the only solution built to warehouse litigation data at scale and provide on-demand capabilities and world-class security.

Let ONE Discovery bring success to your In House Legal Department.
