Bug Fixes

Document Viewer

1. Corrected an issue where users would not be able to see records in the document viewers if they were using the “Show documents in all Subfolders” function and did not have access to all of the records.
2. Corrected an issue where some documents would reflect inaccurate highlighting in the native viewers.

Search

1. Corrected an issue where Processing and Advanced searches with “Is Empty” criteria were returning inaccurate results.
2. Corrected issues when saving Multi-Metadata Searches to dynamic folders.

Redactions

1. Corrected an issue where images that were redacted in pop-out mode were reflecting inaccurate redaction coverage of the image.

Privilege Log

1. Corrected an issue where a column in the privilege log with null values may have prevented the privilege log from being able to export.
