

One Discovery Processing and Review

Right-sized software for every day eDiscovery

Built by eDiscovery professionals for eDiscovery professionals, our software encompasses the best in robust data processing, attorney-friendly document review and flexible production options. One Discovery has all the features you need - minus the complexity and consulting fees associated with competing solutions.

One Discovery is right-sized eDiscovery software optimized to solve the challenges of every day eDiscovery projects which make up 90% of legal matters.

Here's why corporate legal teams are switching to One Discovery:

Patented, powerful distributed processing: One Discovery's patented processing methodologies churn through even the largest datasets more rapidly than any other solution on the market.

Attorney-friendly document review: Designed by eDiscovery professionals, One Discovery's review UI is designed to let knowledge workers get more done, faster.

Used by thousands of professionals: One Discovery's core technology has been in use for more than a decade, with the data equivalent of 10 billion images processed and reviewed.

Fair, flexible pricing: Say goodbye to burst fees and predatory cost structures. One Discovery lets you scale up and down on demand; you only pay for what you use.

Flexible deployment options, including on-premise, hosted or hybrid: No matter your IT infrastructure or needs, One Discovery fits with your organization.

Seamless data flow: One Discovery was built as an integrated solution. That means data stays clean and consistent from processing through production, with no imports or exports necessary.

Effortless management: Manage user permissions, access, storage and more from a single, integrated dashboard.

Tired of paying too much for "advanced" technology you don't use? See what One Discovery can do for your eDiscovery team.
